Trip to my grandma's house at Java alone

Andika Rizky K. P.

17.03.023

It was November 1st 2017. Three days before that day I had prepared everything I needed for my holiday. Yes, I was about to have a long holiday in my grandmother house at east java because I really miss her so much, the last time I met her about 2 years ago.

The time showing 6.00 a.m and I must prepared for my vacation, I looked forward to this holiday. I went to the Sultan Aji Muhammad Sulaiman Sepinggan (SAMS) International Airport at 9.00 a.m and this airport near by house it only takes 10 minutes but, the road is very crowded so we need 15 minutes to get there.

The plane scheduled to arrived at 10.45 a.m, I check in the ticket to go to Juanda International Airport at Surabaya. It took around 2 hours to go to Juanda International Airport at Surabaya by plane, and I still waiting the plane in the waiting room, shortly afterwards the plane that I was about to board come and I hurried to get there.

I arrived at Juanda International Airport Surabaya at 11.40 a.m in here the weather is very hot. I was free to do anything in this city because I didn't plan go to certain places here expect for my grandmother house.

At first, I went directly to the parking area to meet my family to picked me up. Then I bought a soft drink because the weather was very hot.

I saw so many people in that airport and it makes me scared and confused in this place. Because, this was my first time on my own vacation to the city of Surabaya, for my grandmother house in Tulungagung.

Shortly afterwards I approached my family who was waiting for me in the parking area, I was happy to be able to meet my family because I was confused and scared at that place(Juanda International Airport Surabaya)

After I meet with my family, we decided to go to restaurant near by Juanda International Airport at Surabaya city because at that time it was 12.00 p.m when

we arrived at the restaurant we ordered Surabaya food like nasi pecel, soto, rawon and at that time I chose to order food my favorite is rawon and iced tea the restaurant sells various kinds of Javanese food and beverages in this place and also provides fishing grounds and the restaurant is surrounded by fish ponds and the pond contains ornamental fish such as carp

After lunch, we continued the trip to my house. Although the trip was quite far but for me it was a pleasant trip because this was my first experience going to my village to use a car for 4 hours but because the road was crowded it seemed to take 5 hours. In the midst of the trip, our family enjoyed the beautiful scenery around us, we saw vast rice fields, very high mountains, rivers that were passed by heavy water and other very beautiful scenery After spending 5 hours trip, we finally arrived at my grandparent's house. My grandmother was very happy to know we were coming. They looked surprised because we did not tell them before.

My grandmother's hugged me tightly after that she told me to come in and rest inside their house. My grandmother served and asked us to eat. I ate very heartily as I was very hungry since on the trip. After eating, we have a nice conversation. My father was chatting with my grandfather while, my mother, my brother and I joked with my grandmother.

I got a new friend there. They are Anna and Aulia who live near Grandma's house. We have the same age so we can make friends easily. They invited me to play in the field near Grandma's house, and traveled around the village on a bicycle. Then, the next day we went to the chocolate camp in Blitar, East Java, with my family and my new friend there is a vast chocolate garden and this place provides cafes and restaurants there are various kinds of foods and drinks made from chocolate food such as chocolate noodles, chocolate meatballs, naget coklat and drinks like ice chocolate shortly afterwards we returned home and passed various beautiful scenery of rice fields and mountains on our way to home

I really enjoyed the beautiful scenery in this village. The air is still fresh which makes me comfortable to stay longer in here. (***)

The Northern Kalimantan Vacation

Latifah Mayang Sari

17.03.038

Hello, let me introduce my name, Latifah Mayang Sari. I studied at Mulia University, here I will share my vacation trip 2 months ago, where I vacation to Samarinda, Ladaya and Kumala Island with my friends. Because this is my first experience of vacation to Samarinda and Ladaya, and to the island of Kumala, I have been a child.

Plans for a vacation or a trip to Samarinda have been planned for quite a long time, and only in late February have we gone there. The first time I passed the kilo road was what was the Soeharto hill, how about the condition of the hill, because there are many myths that are heard on the hill of Soeharto.

Apart from the stories of myths in Soeharto, it turns out that when I passed the hill the nature was still good, there were many trees too, still fresh for us to breathe the air, even though there was still a little dust scattered. Because the road is often overtaken by large car cars, such as buses.

I enjoyed the trip a little long enough, about 3 hours less is that much. A little long arrived in the city of Samarinda. I've been watching Samarinda for a long time, it's quite interesting to be a vacation spot with a short time.

I and my friend stayed at my friend's aunt's house, we arrived there at about 12 noon. After we get there we take a break, because it gets there the weather is quite hot. After we finished eating at home until evening, we decided to go out to buy snacks. The first day maybe we are not walking around, karen rather tired enough to go everywhere.

The second day we were in Samarinda, activities like usual, getting up early, having breakfast, then helping my friend's aunt at her house. We just walked out in the afternoon and at night. I came out with my friend for a walk around my friend's aunt's house. Around 6:00 we think about going back home first, then we continue the road at night. On that night of the night, our aunt friend invited us to take a walk to the clothing and bag shop. We are there looking at the bags and clothes that are good and the price is quite cheap.

After completing my friend's aunt, we both separated ourselves from my friend's aunt, we walked together and made an appointment to meet with my friend there. Before we met we both walked for a while around all around looking for a gas station around, after we got it and already filled it in, we met with my friend's guy. Meet us at the hangout there. Our chat there, until 10 o'clock, we were both back home to go home.

The third day we were there was precisely Sunday, and we decided to go to Tenggarong to go to Ladaya and Kumala Island attractions. We departed around half past 1 past. I thought that Tenggarong was far away, it turned out that the trip was only about 1 hour less.

Our first goal was to Ladaya, the first time I went to Ladaya and did not regret it because the location was good and many visitors were there too, it was cool to make photos there.

Next we went to the island of Kumala, after a long time not there, finally there again, the place was still just as rich as before, but maybe there were only a lot of games that were no longer functioning, because it was already late in the afternoon.

After that we returned to Samarinda because the time showed at 5:15 a.m., until Samarinda returned at 6 o'clock. I was with my friend

behind my friend's aunt's house, then in the evening we went again for a walk with my friend's uncle, we were invited to take a walk there and incidentally I and my friend stayed at my friend's uncle's house.

Long story short the next day in Samarinda last day, my friend and I were getting ready to return to Balikpapan again, but we returned around 2 o'clock past, we had a short walk to the mall to meet for a while also with my friend, my friend, had lunch. After lunch we returned to my friend's aunt's house to get the items and we returned to Balikpapan.

That's the story of my short vacation but I feel happy. Thanks for reading. (***)

In 2014 my junior high school held a vacation to Teluk Lombok beach in Sangatta, I was in 9th grade at the time, the holiday was fun because there were my friends and teachers, when I got there, some buses were ready to go, my teacher told me students from various classes to make a line, oh yes each class is different clothes are used, different classes I wear green clothes, my favorite color, when I point at 9 and the bus departs departing.

Oh yeah, the Teluk Lombok Beach is relatively easy to reach easily. Access to entry, which I know is two. Pass the Bontang - Sangatta axis road and also the A Moeis road (enter the left of the gas station intersection). Because I was in Sangatta so I passed the A Moeis road. Just follow the big road, turn left on this gas station, to the corner where if we look to the right there is a dirt road.

Broadcasting access that is quite dusty and slippery is mostly muddy during the rainy season. Because of the company's roads, along this road, I remember that there were minimal directions to the coast of Teluk Lombok. Only special companies are installed on the left side. But there are super-sophisticated "live" signs that we can make a benchmark. Namely the description of the local population. If the trip runs smoothly, approximately 30 minutes, we will arrive at the gates of the Teluk Lombok.

If you've made it here, it's a little relieved. Although you must remain careful, slippery or dusty. Get to the beach. Uh, it doesn't feel it's almost half past eleven. It means that about an hour from the starting point on my junior high school on the street Swarga Bara arrived here. The bus arrived, I rushed out because the day was bright so it was quite hot. Immediately look for a place to rest first bid thirsty and a little tired.

The tourist area of Teluk Lombok beach is in Sangkima village. I saw my friends who were resting, some were swimming, some were swimming, I was just sitting there enjoying the natural beauty, public facilities like a village and recreation were also available.

There are mosques, sports fields, wooden lodges, food and drink shops. because it is still in the company area, there are also some special facilities / prop-

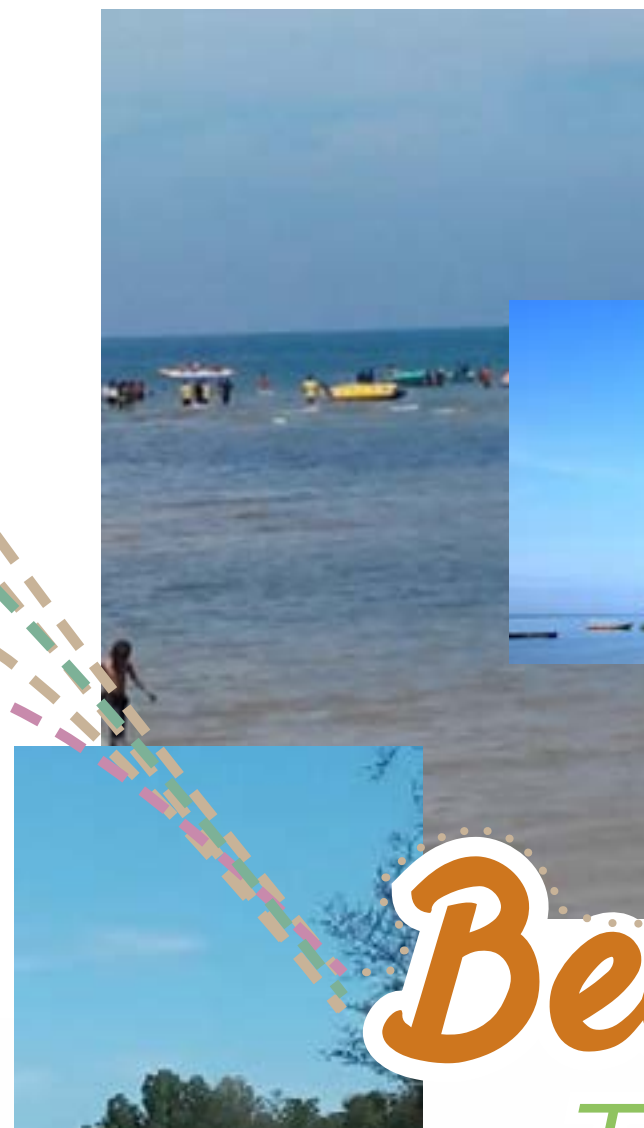

erty owned by the company. Teluk Lombok beach is also shady. In addition to the thick trees, there are also many lodges that are free or can be rented here.

The panorama is quite typical. The corners of the beach are antique, with mangrove plants. When the tide is high, the beach is more beautiful. It's quite different if the sea water is receding. So happy to see such a rich sight. Mangroves that are submerged due to the attachment of sea water. Mangroves that are submerged due to the attachment of sea water.

I myself took a walk around the beach, while looking at the scenery there, my own friends were swimming, playing football, and various other activities, about 1 hour more I went around, I also rested in a wooden cottage teak whose roof is covered in straw.

Lunch has been provided with the school so I don't have to bother carrying lunch, as I recall, my friend and I ate grilled chicken and drank aqua glass in lodges, jokes and jokes radiating on my friend's face, it was really nice to eat together enjoying the beauty of this beach, I don't feel the dawn has arrived, I rush to take a shower to go home, after arriving there I just realized I forgot to bring money to pay for bathing, I returned to the lodge, while holding shame, my friend just laughed at me After showering, my friends and I went to the parking lot to wait for the bus there.

While we were waiting for the bus, the teachers told us to line up and count to make sure there were no students left behind, finished being taken away by students from various classes ready to enter the bus, after I arrived on the bus, the tired and exhausted atmosphere radiated on my friends' faces, about 30 minutes more the bus that I was riding had arrived, I rushed out with my friend and then we went home using public transportation, it was really nice to have a holiday like this, it didn't feel like I was in this junior high school, I'm sure every meeting would be farewell, hopefully This separation became the most beautiful memories for me and my friends. Beautiful Teluk Lombok Beach

Agus Diemas P. D.
17.03.065

Exploring The City of Solo

Surakarta City, yes it can be called a solo city Being in the Central Java region, for those who asked why I chose Solo City as my theme this time, because there were so many impressions I had experienced while on vacation there and I never forgot, before introducing my name Nur Wahyu Ningrum, there are a lot of nicknames that call Yuu, yuri, acos, wahyuni, yuni, ... and many more, but the nickname that I like is still yuni, just a short introduction. Continued the story.

Nur Wahyu Ningrum

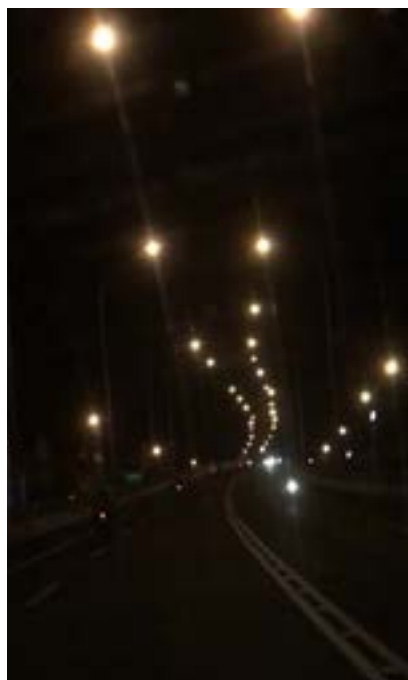

17.03.027

At that time, before arriving at the solo city I had to get off at Adisucipto airport first and go to the train station which is located not far from the airport, I

spent about an hour, to be able to get to the solo city, at that time I felt very tired but it was shocking and I could see the view from the glass even though I stood while on the train and there were many funny experiences that happened during my trip at that time.

After a very long trip, I stopped at one of my friends' houses to take a break, because I was so hungry. I was invited to the most famous place to eat in the city of solo, where the hits were very many visitors and very tasty, of course, the name of the place was "Gacoan Noodles". The place is very comfortable and the food menu offered is also very interesting. Although there are many interesting menus, one of my menus is my favorite "Level 5 Satanic Noodle". This is the most delicious thing for those of you who are very happy, don't forget to make all of you maybe this vacation is one of the recommended places to eat. After being full, I decided to go home first to rest. So that I can be fit to continue my vacation trip.

To the next day, it's very bright around 7:00 am I wake up to get ready

to continue my vacation trip. I decided to choose the cool places in the area called "Tawangmangu" this place is very famous for the charm of the highlands.

Approximately to get to the first place "Omah kodok" I have to go through one hour trip. Before arriving in the first place I took a moment to enjoy the view of a very beautiful tea garden. So cool it felt, I was very happy at that time, so I was eager to have a house in the middle of a tea garden.

after arriving and through a long journey until the first place arrived at the "Omah kodok" Here the place is still the same, with very green scenery and there is something very interesting in this place there is a small waterfall that is very suitable for family time, Many snacks are very delicious in this place Very suitable for calming the mind.

Next trip I did not go to one place, I took the time to come to "Lake Madirda" This is my next two choice places This lake is very beautiful, from the first place I spent half an hour to get to this security, the trip was very steep and extreme It takes a trip to get to this place, even though there are many challenges, it is very much paid for by the beautiful charm of the lake with clear and green water, this place is very much visited, at that time I wanted to fish but because I was not allowed to fish so I could only enjoy just natural beauty.

After spending my afternoon there in the middle of the trip out of my lake I had stopped briefly to enjoy a very beautiful view I did not know the exact name but I had time to capture it.

Continuing the trip, I decided to go back home but I did not go home first but I spent my night with my best friend in the "Karanganyar Square" This place is like a night market where there are many who sell food and play rickshaws. It was also very fun that night, and I decided to sit down to rest for a while, and spend the night telling stories with my best friend then after that I decided to go back home.

In the middle of the trip to my house, I also did not forget to capture the road that many young people like to enjoy, that is the over-groove fly. This road is very much liked by young people in even solo cities, intentionally having to pass this road to capture on their social media.

This bonus for you, there is a scene that I might rarely get in my own city, which is sunset in front of my best friend's house. The sky is very beautiful, and by chance my best friend's house is in front of the Bengawan Solo River It's not satisfied if you spend a short amount of time in a solo city, maybe this is part of my holiday story and experience, hopefully it can be a reference for you to vacation in a solo city too, and can come to a place that I might have a chance to visit. (***)

Irwan Saputra
17.03.070

Kalimantan is indeed famous for its wealth of rivers, which number in the tens or even hundreds. There are many rivers of various sizes and lengths. Aside from being a river transportation tool in Kalimantan, it also has a variety of amazing natural beauty, one of them is the Mahakam River in Tenggarong, East Kalimantan.

Kutai Kertanegara, which has a capital city in Tenggarong and has a large river, has a beautiful recreational park located in the middle of the Mahakam River. Recreational Park is Kumala Island Tourism Object. If you visit Kumala Island, you will be treated to various rides such as Ancol in Jakarta. Besides that the natural beauty of Kumala Island is very amazing with the river and the City of Tenggarong.

Kumala Island is a delta area that a small island in the middle of the Mahakam River. This small island extends to the west of Tenggarong City, Kutai Kartanegara Regency. From 2000, the 76-hectare land was designed by the local government to become

a recreational tourism park whose architecture is a blend of modern technology and traditional culture.

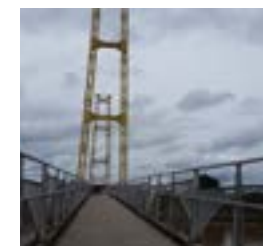

Before entering, I had to buy an entrance ticket, which cost Rp. 10.000. To go to the island, because it is located in the middle of the Mahakam river. we must to pass with, some of them headed to the island by boat, but we chose to walk through a bridge that was specifically made for tourists.

In the middle of the island there is a playground, there is bicycle rental, there is an electric motorbike rental, there is a delman rental, there are several traditional houses in the middle of the island, there are several royal buildings, there is a unique triangular shaped toilet, there is a large lion statue at the end of the island and some food vendors that are provided specifically for tourists, trees are also quite widely planted on the island, there are some animal cages that look empty, maybe they have been moved. But there is something that fascinated us with the island, this island is indeed what my brother said is shaped like a boat.

Out of curiosity, we ended up riding a bicycle together with a rental price of Rp. 50.000 as much as we like and walk down the island. right at the end of the island. there is a large writing, namely PULAU KUMALA. we also took a photo in front of him, besides, the photo with the background of the Tenggarong bridge looks good.

I think this island is very good to be a holiday destination, so after being satisfied, we finally decided to go home. (***)

The Kumala Island

Prilly Amalianthy

17.03.024

the best

Gift

Hi, my name is Prilly Amalianthy. you just call me Prilly. Exactly 3 years ago when the semester vacation arrived. Mother and father will take me on vacation to Jogjakarta because in August is my birth month, they invited me there because it was a gift at the age of 17 at the time.

We immediately went to the SAMS airport (Sultan Aji Muhammad Sulaiman Sepinggan) in Balikpapan. We immediately checked in and boarded the plane.

"Wow, it's really nice, on the plane," I murmured. On each bench there is a TV.

1.5 hours we were on the plane and we immediately landed at the Adisutjipto international airport, which is an international airport in Yogyakarta. The airport is located not far from Maguwo Station, which is the most active and eastern station in Indonesia and has four railway lines with lines 2 and 3 as a straight railroad ... We immediately got off the plane.

After that we looked for a taxi and asked the driver to take us to the closest hotel. He drove us to a hotel located near Malioboro. We go directly to the reception and order one room for tonight and tomorrow. The receptionist gave us a card that we could use as a key to open our room. We went to our room and took a quick shower, changed our clothes and then went down to the lobby again. Along the way I found many tourist attractions. I also asked for a picture at one of the famous tourist attractions, namely Taman sari Jogja, said to be a bathing place for the royal princess.

After a long tour, we found a large and magnificent hotel. We go directly to the reception and order one room for tonight and tomorrow. The receptionist gave us a card that we could use as a key to open our room. We go to our room and take a quick shower, change our clothes and then go down again to the lobby. The facilities are many and complete, such as: swimming pool, sports facilities, dining room, garden, and many more. We stayed at the hotel for 3 days. After that, we headed to one of the places by there, which is at Malioboro right at Beringharjo Market, which is located on Jalan Malioboro, where at 7 am there are already selling but still a little, at 9 in the morning all the sellers actually open their kiosks and close around 16.30. The characteristic of this market is selling clothes with batik motifs, there are negligee, shirts, skirts, pants, children's clothes, bed linen, tablecloths and cloth bags. Normal and affordable prices. Very good shopping for souvenirs at Beringharjo Market. Incidentally, there are often street music shows with traditional musical instruments such as angklung, flute and drum. But, the participants came from Jogja who were certainly talented young people. After we were satisfied watching the show until it was finished. We immediately headed to the restaurant.

"Ma, what do we really want to eat?" I asked Mom.

"We will eat typical Jogja," answered Mom.

"What is that?" I asked again.

"Gudeg is Yogyakarta and Central Java special food made from young jackfruit cooked with coconut milk. It takes hours to make this dish. Brown is usually produced by teak leaves cooked together," explained mom. I just nodded.

After we finished eating, we immediately went to the hotel again.

The next day, I went to the tourist attractions such as Borobudur Temple, Borobudur Temple, a Buddhist temple with 504 statues and 1,400 reliefs. From the top of the temple we can see beautiful scenery. located in Borobudur, Magelang, Central Java, Indonesia which is included in the seven wonders of the world and Prambanan Temple, Prambanan Temple or Roro Jonggrang Temple is the largest Hindu temple complex in Indonesia which was built in the 9th century AD, wahh very old ... after there we go to pine forest and others. During my time my family and I explored many tourist attractions, added knowledge and experience that was only at the age of seventeen at the time.

I feel tired that day but I feel very happy to visit the famous Borobudur Temple as one of the greatest legacies Indonesia has ever had. I hope the temple can be loved by all visitors and also the government.

The last day here, we visited Parangtritis beach. The sun is bright and the scenery is very beautiful there. I feel the wind blowing towards me. I also saw many people on the beach. There are many birds flying in the sky. In addition, there are many sellers who sell various kinds of souvenirs. And Secondly, we visit Gembira Loka Zoo. I saw many types of animals there like monkeys, tigers, crocodiles, snakes, and so on. I looked at the Zoo, and also photographed the animals. Then, I felt hungry, so I went to the restaurant. As soon as we finished lunch, today I decided to go back to Balikpapan.

For me, this is a beautiful day. I really enjoyed it, and hopefully can visit Jogja again. (***)

At that time, when we finished following the "UAS" we decided to go a walk along the beach to remove tiredness after the uas, the plan is made from one week before the semester uas one and also a mature seriousness and plan from us, It's not easy to be able to go somewhere because the plan was not to go to the beach but the roads to the penajam or grogot but after discussing and looking at the budget limitations and because at that time the plan to the penajam and tau grogot to stay and renting lodging.

But once in the calculate of the budget and also the difficulty of some us permission from parents so we are having discussions for a walk to the beach is not easy to directly decide to go to the beach because the sons and opang disagree, then we votting held to determine the go on vacation to a place what with the results of the selection of the deal is to go to the beach and do not stay because of the budget and not given the permission of some of us. Then we agree for a vacation on the beach after a discussion for the purpose of vacation and then discuss what foods would want to

bring in when it's anybody want to burn their chickens at the beach and there is fuel also said there was no need to burn the word son because told later bother again, after careful discussion about food eventually many who agree not to burn-burn well in that moment of revelation say chicken fuel use vegetables No.

Well there we said yea wear time of grilled chicken no vegetables haaha when Revelation noted for vegetables she said use of tobacco no. Well there, we were all laughing (Yes there are tobacco vegetables time). Keca answer vegetables where there is sharing of tobacco there is-there is ye yu. When you're done with the food would be brought and (reserved vegetables, tobacco usage anyway). The next day gathered at the home of arif for going to the beach and we used 3 Motors, having traveled less 2 hours late we got. After dipantai, we immediately look for a shady spot after earning a spot that matches our short break.

Alexis Team

Alya Damayanti

17.03.073

Coincidentally the day's weather is quite hot but there are also wind so we relaxed-casual first while to fill the belly already sounds. When you are finished filling our stomachs divided revelation plays guitar, son, arip, keca pictures and recording wonder what they record I do not know, kalo opang he played mobile, while I am Yes obviously certainly sleep (since I like to sleep ahaha) .. due to the still small voice despite the blazing sun.

After that they went to the sea-side for further pictures of the video

and also main water while running (hahaha ... you are truly hilarious that time I was very happy the time had friends like them) , after I am satisfied to see them from above, I followed and joined those still eggs with their activities. After everything settle for playing, we decided to go home because it was too healthy ... but before going home we take pictures together. Vacation this time gives the most beautiful memories for me thanks to their ... Thank you all friends. (***)

Michelle Goeynadi

17.03.021

Tongaci Beach is located in Kampung Pasir, Sungailiat, Kabupaten Bangka, around 3 kilometers from Jalan Raya Sungailiat-Belinyu to Matras area. This beach is a marina, a recreational area as well as sea turtle conservation area.

Tongaci Beach has white soft sand and unlike most beaches in Bangka Belitung, this beach does not have granite boulders. The beach area has been engineered and equipped with recreational facilities as well as other supporting facilities such as wash rooms and toilets. There are also amenities in this area like restaurant, food kiosks and meeting place. There are several villas that can accommodate tourists to stay at Batavia resort, next to this beach.

Tongachi beach is better known as sea turtle conservation area. At this beach, there are a pool for green turtles (*Chelonia Midas*), Hawksbill turtles (*Eretmochelys Imbricata*), tanks for baby turtles and a breeding area inside the marina. This sea turtle conservation is run by Tukik Babel Foundation. This foundation previously operated in Batavia Beach. At certain hours, visitors can hear the bell ringing, giving the sign to the sea turtles to have their lunch. Visitors can watch the officers there feeding the hungry sea turtles.

At Tongaci Beach, there is also a museum called Museum Garuda. This museum houses potteries, old photographs and various colonial artifacts. There is also a book gallery. At the plaza in front of the museum, there is a locomotive that derived the name of this area: De Locomotief. This area is artistically designed. Visitors can also see an art gallery and a giant wood log. Occasionally, visitors can enjoy live performances.

At Tongaci beach, visitors can swim, play and enjoy the beach scenery. Here, visitors can also try several health, recreational as well as water sport facilities. This beach is open for public from 08.00 to 18.00. Nevertheless, in

the evening visitors can have fine diner at the restaurant/ beach bar that performs craftsmen working on traditional products that can be purchased as well.

Typical Bangka Belitung Province cuisine, especially in Bangka Island, carries local wisdom values just like any other cuisines in Indonesia. Owing to its proximity to sea – as a dominant area – seafood and its by-products have become the favourite besides food-crop products. Dried squid, fish, shrimp, and sea worm, dog conch, sea cucumber, shark's fin, rusip – fermented fish–, kecalok – fermented tiny shrimp –, and pekasem – fermented barnacle – are some of its preserved food. Those seafood are also enriched by the processed food to give a wide range of taste like Keretek, kempelang, kericu, kerupuk, samballingkung, terasi – shrimp paste –, otak-otak, empek-empek, lakso, bergo and pantiau, not to mention the traditional between-meal snack like martabak or hok lo pan, rintak sagu, gandum, rangai, talam, bugis, jongkong and typical dodol made of cempedak or durian. Non-timber forest products like sweet and bitter honey are nutritious drink especially the last one which is rare to find and undoubtedly good for health.

The well-known dish here is Lempah Kuning for it is not only the main dish in family and society but also in traditional and religious ceremony. Lempah

Kuning is served before and even after the celebration. It is not only eaten up by the community but also cooked together by them under the living trad

ition called Sepintu Sedulang carrying the philosophy of togetherness in every aspect by doing something collectively. Lempah Darat or three condiments dish (terasi, chili pepper and salt) is also served to make it even tastier. This simple dish expresses the simplicity of Bangka Belitung community as uncomplicated and economical people who respect time – easy to cook and tasty to eat. Meanwhile, Cacak is served as a between-meal snack in the afternoon as the companion for coffee or tea.

Owing to the philosophical meaning expressing the characteristic of its community, the cuisine needs to be kept living among the society and also served not only to satisfy ones need of good food but also experience the traditional life of the people. (***)

ZOMBIE OUTBREAK

Naufal Fardan
17.03.021

“Robert are you ready? Your brother will angry again if you late” I said to Robert. “I’m ready dude” Robert’s reply. When Robert board the car suddenly his brother aka Henry’s phone ringing. “Halo... what? HAH!!!! Okay... yes... yes...” said Henry to the person who called him. “What happen? Why you panic?” ask Robert to Henry. “Dad said there’s plague and riot in this city but they said it undercontrol” Henry answer. “Should we cancel going to the mall today?” me try give advice to Henry. “Nope, we will go but I will carry a gun. just in case” Henry’s reply.

Oh yeah introduce me, my name is Kai. I’m a freelancer on Raccoon city. Me and my bestfriend Kotaro came to Balikpapan to enjoy vacation after our big project has finished. Robert, Henry, and Kotaro is my bestfriend since high school. Henry and Robert is twins but Henry more older than Robert and he is our leader because he is the most wise person among us also he following his father carrer wich is military carrer. Of course their father is an high rank officer military.

Wearriveatamallthenwegostraighttocinematowatchavengers. Henry give me an order to but the ticket while he buying some popcorn and drink, after he give the money I immediately queued at the counter.

While waiting in line I see a men with face very pale and badly cough, I think he have fever so I keep waiting until my turn. When it is my turn to buy a ticket, suddenly that men lost consciousness and everyone rush to help him. Suddenly another person around me lost consciousness too. My instinct say something happen then i remember Henry’s word there’s plague in Balikpapan, I think this is the symtptom. Immediately I check that man’s vein and I feel nothing, THAT MAN IS DEAD!! After know that man is dead i run to Henry, Robert, and Kotaro waiting.

“We have to go” I’m yelling to all my bestfriend. “What’s matter? What happen there?” Robert trying to asking me. “I have bad feeling right now” my answer to Robert. “Let’s leave this place” Henry trying give us order to leave cinema. “why you look panic too Henry?” Kotaro asking to Henry because he’s confuse with our act. “Kotaro, shut up” I’m yelling to Kotaro. We go from cinema to parking lot but on the way Henry stop at sports shop, he buy some equipment that I did not know what is it and Henry give a signal for us to go to parking lot first. After pass exit door I hear a woman scream, she struggled ask help but nobody help her. When I want to help her Robert stop me and force me to ignore it.

At parking lot, when we searching Henry’s car suddenly we find is an old man eating man’s body. Immediately we run from him because scare. When we found Henry’s

car, suddenly Kotaro stumble and his head hit the floor and bleeding. I could not do anything, im froze seeing Kotaro in pain and that old man approached Kotaro. I’m sure this is just a nightmare. I’m sure when I wake up, everything will go normal. While im busy thinking this is real or just a nightmare, suddenly Robert shot that old man in chest. “WHAT THE HELL, ARE YOU CRAZY?!” I’m yelling to Robert. And suddenly that old man stand up again and approaching Kotaro. Without hesitation Robert shoot his head twice. “BLOODY HELL, YOU JUST KILL A PERSON!!!!” im yelling to Robert again. “HE IS NOT A PERSON DUDE!!!!” Robert yelling back to me. “Don’t you see, he just ate a man. Plus lot person turns like him inside the mall” Robert try explain his action to me. While im still trying figuring out what just happen, Henry come to us following with people like that old man. “Help Kotaro and get in the car now” Henry yelling to give an order to us.

Short story, we escaped from those crazy person. I see lot people running away from people like old man i meet on parking lot before. Along the way we see Balikpapan in chaos. Fire, explosion, dead body, cannibal, and we can hear gunshot from everywere by soldier and police trying to protect people. After 20 minutes later we arrive at home, I go to my room to calm down and trying to understand everything. Soon Henry call everyone and look’s like Henry’s father want to tell us something from his phone. “Hello everyone, first. Collect all item you need. You have 5 min to do that” Henry’s father give us order. We all split up to pick up item we need. I take a laptop, few pieces of clothes and pants, a folding knife, and some put. Everything I put it on my bag except folding knife, I put it on my pocket. When everyone done taking their stuff, Robert speak to

his father “all done dad”. “okay now listen carefully. Go to my room then open the cupboard, there’s a key under my pile of clothes then use the key to open storeroom behind cardboard pile you can see safety box. the password is 12041979. Take everything in the safety box then go to Port Semayang it place for evacuation. You must move as fast as possible, if you meet with undead person just run don’t fight it. Henry, you is the captain now remember your training on military. In this situation..... *uuuuuuuuuuut*” Suddenly phone call from Henry and Robert’s dad has stopped.

Without wasting our time we obeying instruction from Henry and Robert’s father. When we open the safety box, we see several military ration and 2 assault rifle and 1 handgun. We took everything in the safety box then Henry tell us to get into the car to leave the house. Before leaving home, Henry give me a weapon. Im shocked because this is the first time I hold a real weapon but Henry said it just an airsoft gun so I can use it even without training first. But actually even without training I know how to shoot because I learn in from Virtual Reality Game.

When we want go suddenly an undead come to us, fortunately only 1 person. I see Kotaro who holding a handgun has panic and shoot that undead person but the bullet is miss. On second bullet he can hit body’s undead person but he keep moving toward us. i tell Kotaro to step back and I try to shoot that undead person from his leg until his head. When I hit his head, he not moving again then I try to approach him to make sure he was really dead and im sure enough he is dead so we conclude that undead person will die if we shoot it on the head. Not long after that undead person I killed, another undead person approaching us. lucky the car has come out from garage and we hop in the car. In the middle of the trip we can not continue our journey to the port Semayang because there is several cars blocking our road, so we decide to walk because distance to port Semayang only few hunderd meters left.

We were close to the port Semayang and it guarded by soldier and police. Suddenly from our back, undead person not one or dozen, but hundreds trying to chase us and some of them are running. We immediately run while asking for help to soldier and police. There one of police men waving his hand, hint for us to come there as fast as possible. While we running, Kotaro screaming with holding his leg. Without lot thinking Robert and me carrying Kotaro while Henry and several police and soldier covering us with firing to undead person. When we pass the barricade and enter the port. All police and soldier are open fire, shooting to all that undead persons. We take Kotaro to a tent to be examine by doctor, look like Kotaro’s leg injure quite badly. While Kotaro treated by doctor, a soldier maybe the leader call Henry and go to another tent to discuss something. I left the tent and looking around, lot Balikpapan residents who fled here. In my mind I only thinking “when this disaster end, is god punish us with this? Why this is happen?”.

We have settled in port Semayang. In just 4 days, this port become really crowded with refugees and because of that I am sure food supply will definitely run out. Next day, at night there is a helicopter carrying food for refugees and it land at port Semayang. While the helioper touch the ground suddenly a bunch of the undead come to us. Not as fast as when we evacuated to Port Semayang. The soldiers around harbor immediately alert to eradicate the undead but because too many undead come to us, the undead has successful penetrate the barricade. I see an undead trying to eat a soldier, that soldier screaming for help but no one hear him except me. I can’t do anything to him, I can’t help him because im too scare with undead. After several second he don’t have any strength left to fight the undead anymore so he let that undead person eat him. More I see that moment. (***)

Occupational Health and Safety Training Day

Agustina Roben
17.03.055

Hi guys, My name is Agustina Roben. I want to share you a story about my experience during training Occupational Health and Safety (OHS) at PUSDIKLAT in Cepu, Central Java. It happened when I was 20 and still working at a company engaged in construction and maintenance. It was my second time but I feel it was my first time. Before the training, we must follow the selection examination psychological test and an interview. This activity was held by the biggest oil company in Indonesia from France, that is TOTAL E&P INDONESIA. I felt confident even the participants very much. At that time, the result was not right out but we have to wait in 2 weeks for the next information. In this case, the participant who receives the message it means they passed the test. How lucky I got the mes-

sage and entered the top ten. Thanks God... I almost concerned with the cost to go there but they said that all costs are borne by the company. Starting from airplane tickets, buses, residences, and most important is consumption. It made me very happy. DOUBLE LUCKY!!

It takes 2 hours from Balikpapan airport to arrive in Surabaya airport, then take the bus to go to Cepu in a few hours. When we arrived there, we were given an explanation of the rules that must be obeyed while there. We stayed for a month in a guesthouse provided by the company. During the training, I got a lot of experience like how to apply sound level meter, gas detector, SCBA. The two things I like the most are CPR (Cardiopulmonary resuscitation) and Fire Fighting. Let me explain a little about them.

FIRE FIGHTING

CPR

Cardiopulmonary resuscitation (CPR) is an emergency procedure for a person whose heart has stopped or is no longer breathing. CPR can maintain circulation and breathing until emergency medical help arrives. This technique is very useful, especially for unexpected events like first aid for a drowning person. Someone who haven't had training before, can do this technique. All you have to do is just chest compressions with hands-only to keep blood circulating until emergency help arrives. I want to share you a little bit the technique that I've learned. First step is use chest compressions, second is clear the airway, then do rescue breathing. Do it for 4 cycles then check the victim's pulse. Repeat it from the first step until emergency help arrives. Maybe you can learn more the techniques by watching the videos on YouTube.

What? Fire Fighting?!
Hmmm.... fight with fire.
Okay, that's what I do while there. The training we did was actually fun but tense where we have to put out the fire that is burning in a pipe or a vessel. It's not as easy as we think. We have to found the valve to disconnect the fuel that is connected to the fire as its fuel so the fire can be extinguished quickly. As it turns out, to extinguish the fire not only use water but can use chemicals such as CO2, or foam. It has its own uses.

For example, water can't be used to extinguish a generator. The reason is simple, yeah simple. You will be electrocuted!!! A burning generator that is still connected to electricity cannot be put out with water but with CO2. With CO2, the fire can't get the oxygen it needs to burn, so it goes out.

It's been 3 years since that moment. I got a lot of things when I was there. Espe-

2

cially getting new friends, met new people, and establish new relationships with friends and teachers. The teachers who taught us was very nice and intelligent. I learned a variety of lessons given by the teachers. I am happy to have met them. It's sad to be separated. We were collected in one place but separated again to return to our respective places. I miss being there. I hope someday we will meet again. Thank you. . . (***)

Aditya Pratama

17.03.056

The 1st time I use a computer on 2006 when the cafe have the best game on that time. Almost all the kid that I know playing the game that called Counter Strike. I am almost everyday going to lcafé just to play that game until I ask my mom to buy me a computer.

“mom can you buy me a computer so that I can play games at home” I asked “No you still a kid” she replied I know it's hard begging my mom to buy me a computer so I forget that request because it's no way she want to buy me a computer.

Until few years later my mom buy me a laptop that is the best day finally she buy me something that I want. The 1st laptop I have is Axioo and the first time I was done was playing game on it. I play zuma and some game on that laptop until I get bored then I try to downloading some game from the internet and I realize I don't have modem to connect to the internet. Few days later I ask my dad to buy me a modem.

“dad can you buy me a modem so I can connect to internet” I asked “offcourse” he replied

Then I and my dad go to computer shop to buy me a modem. When we arrived there were so many choices so I get the cheapest one because this is the first time I use modem just in case I can't use it properly. Until we get home I am give it a try to connect the modem and I forgot to buy the SIM card for the modem so I buy a SIM card in the nearest shop. Then I'll try it again and it successfully connect to the internet.

after connect to the internet I use it to search some information about game until one day I found blog that catch my eyes then I was interested to creating a blog. I search more information about blog and it says “Easy to make” so I get into it. at the first time I am struggle so much until I create my first blog with simple layout. After my blog was successfully created I search more and more infor-

mation about blog and I found how to design the layout.

So I try to make my own layout for the first time I need like 4 days to create my own layout and it's so depressed me because so much a new thing going on in my head. After few weeks creating my layout for my blog I learn a lot of things and here I am getting to know coding.

After a years using that laptop I feel the laptop getting slower and slower so once again I ask my mom to buy me a new laptop.

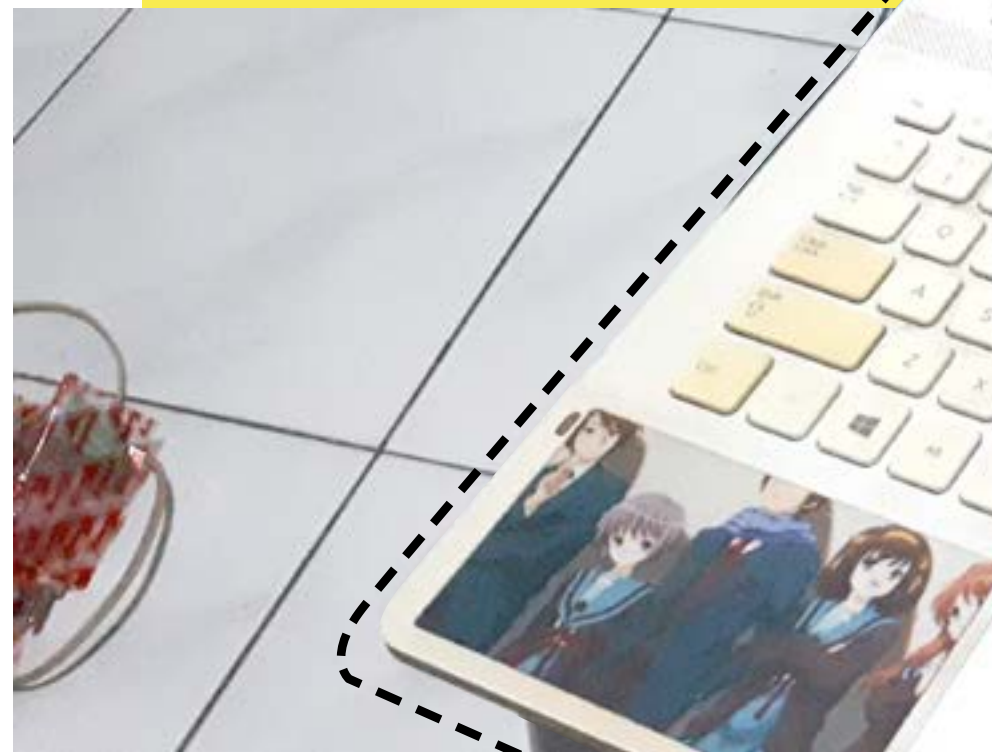

“mom can I get a new laptop” I asked “for what? That laptop are still good” she replied

“this one is starting getting slower and slower and this very laggy to play the new game” I replied

“later if you are in 3rd grade junior high school I bought it”

Until the times come I got my 2nd laptop it's more bigger and more faster than the last one. I became even harder to learn coding again after I bought a new laptop and did not forget to install a new game to play later.

Day by day has been past and I am getting better and better at coding beside that I playing video game a lot to reduce my stress. After using a computer more than 10 years I get a lot of knowledge that I had never learned before. (***)

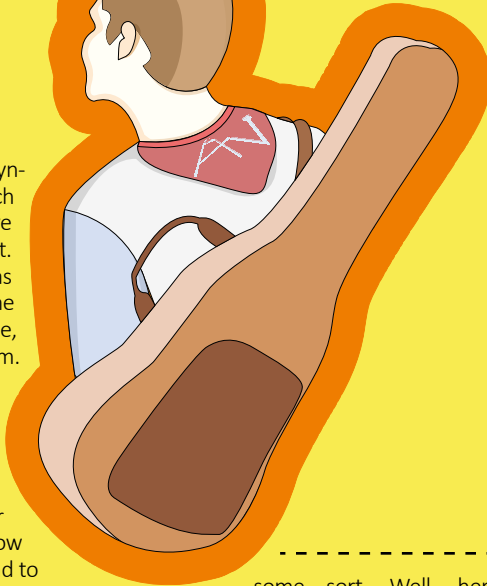

What I Get While Using a Computer

I was literally go with my “issues” story (the imposter syndrome and ASD stuff) but, it would be exposing too much and people will saying that I’ve been just fake it, so I’ve been come up with another story that I never thought about. I’m introvert nerd who so into the “Computer world” since I was a kid. I’m going to tell you why and how I’m so into it. Here’s the story and I’ll try my best to compress it as much as I can because, you know, a lot things happened I couldn’t write it down all of ‘em.

One day, I went to visit my cousin house at Martadina-ta, and on his house, there’s a brand-new PC desktop (it’s old btw) I don’t when he bought that. It has Intel Pentium II @ 990 MHz (if I’m not mistaken) and 500 mb of ram, and Windows 98 at first but after that it was installed the Windows XP after the XP’s debut. It was a mid-end computer, not fast, not too slow either. It was another awe when I’m looking at it. I’m so bound to that computer. The first time I tried is, Windows Explorer, then Internet Explorer (but since the modem is hasn’t been refill, and the signal is sucks there, so the modem cannot be use). After exploring the almighty Windows XP, last tribute to this new shiny computer before I go home is, Solitaire and 3D Pinball. Bloody hell, I was sat all day on there and it was the obsession that finally to be discovered.

From there, everytime my dad would went to my aunt’s house, I’m begging to take me too, then I’m excited. My cousin even (sometimes) didn’t get a chance to use it lol. But, we still play along. We play like, higher score on 3D Pinball, Solitaire and stuff. And when that time, the modem that I’ve been talking about before has finally can be use to browse the internet. The speed is unlike nowadays. It was approximately, just 10 kbps and at that time it was fast (we’re using the mobile broadband USB modem stick). Well, the website is pretty cloggy, cheesy, and some just simple plain website some just too much graphic and gifs (well, here’s the meme became popular). This is where I’ve been introduced to the internet.

We’re surfing the web for almost, like an hour, it was like a new window to be open. Well, we’re just surf some useless things and online games that unfortunately didn’t work. So, since then, I always imagine if I could in the future, I could get into the tech industry or

some sort. Well, here I am.

No, it doesn’t end on that. At my home, I wrote something that come up in my mind, yes, I do this long time before I even know the computer and stuff. It’s like I couldn’t hold it and I need to write it somewhere, but now since people throw me a tomatoes a lot, I learn and figuring out how to keep this on my mind only. That’s for another story.

Okay, where we are? oh sure, home. Well, short brief, finally the computer is just a junk at my cousin’s house ‘cause either way they don’t know how to use it, or they bought a new one, idk, so the computer bought in here (I actually, I don’t know why, but I’m so glad and excitement at once).

From there, I learn a lot about computer. I remember that I’m waiting to register the “early morning” internet bundle, like every 3 or 4 am I’m wake up and browse the net. Then, I start to tweak it, install something like widget and personalization tools to make my computer (*cough cough my computer cough*) look a bit nice rather than old looking dinosaur age OS that looks crap.

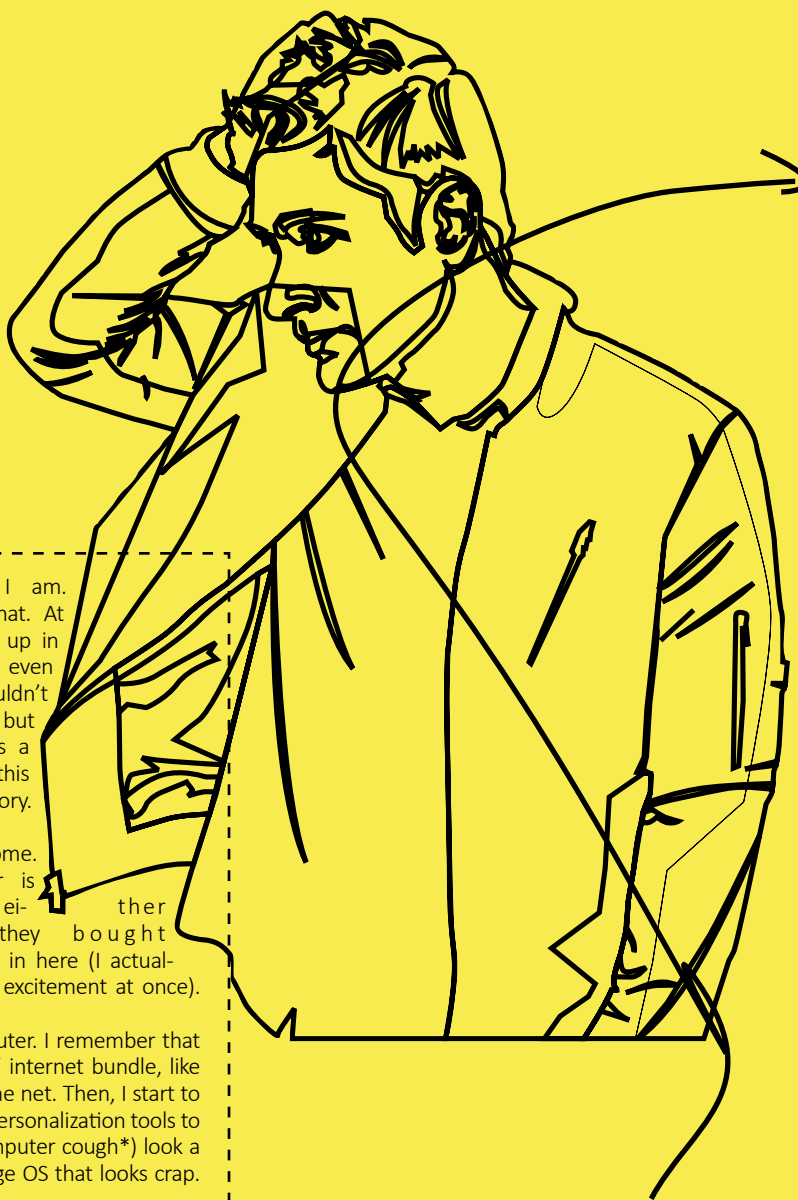

Fyi, I know about computer viruses, privacy, data mining etc since I owned the computer. That is why since I was a kid, I make some protocols and execution backup in case something out of hand, and at this time, the Top-Level Secret (or TLS) has been made.

Okay, since then, I’ve got my own phone too, the ol’ Sony Ericsson, wow, me and my friend always messed up the bluetooth and infrared camera alot, and we think we can detect a ghost, in palm tree lol.

So, probably my parent and people around, and what-so-called friends, knew that I’m a computer nerd. I was the one of among of my “friends” that could handle and operate computer, I mean by using the Windows and Office apps, and surfing the internet. That’s why at 6th grade, my computer teacher is always do like writing at the board, a bit kinda explanation and stuff, and turning on the computer. (Disclaimer: I don’t want to talk about my 5th grade and below, it’s crap btw, but it’s actually where the computer interested got into my school). You know, all the computer is still XP though.)

Fun fact, my other cousin have better PC and I use it alot when visiting her. It has the internet and Gamehouse too.

At junior high school, things got, well a little rough

services and programs is not running except the necessary system services only that allowed to be executed. But the result is so clumsy.

So, my mum plan to bought me a laptop, but turns out my younger uncle ordered for me first so my mum paid it, it was out of the plan. I use it, install Virtualbox, tried Ubuntu, and Bluestack. It was horrible but better spec than my PC at home. It have 2 gig of RAM and AMD processor (I forgot the type) @1.0GHz, but have 500 gig of hdd tho.

I’m planning to enter the computer-related VHS school and found National Vocational High School 3 have it (SMKN 3 Bpp) but didn’t get in so, then I went to different class major (if I’m not mistaken the translate of “Jurusan”). I went to Graphic Design, still at the same school, then sign up on there. There’s a test, the test is to drawing something (given by the instructor), with pure hand. Well, fyi, I never drawing so I’m a bad artist, I even not an artist, not at all, my drawing is sucks.

To be honest, I’m doing it more worse than I’m doing at the computer major test (it was easy test but my grade sucks). My final hope is to get general senior high school. The result come out, and I get in! Thank God!.

When I enter the senior high school (VHS by I mean), my laptop was painfully to use, but keep remind me that I loved it better. Plus, my teacher says that you need a high spec laptop to follow all along the semester. But, screw it, I tried to use my laptop as I can. As usual, I’ve

but not too heavy, well at least there’s no teacher will bully you at school, no? yeah it got worse than that.

When I look at my school (junior high school, by I mean) computer lab, I was more stunning because, it’s the Windows Vista installed on the computer while my computer at home is still bloody Windows XP. One thing I notice on tray icons that bothered me a lot, the dang cursed pole bear icon, DeepFreeze, gosh. Everytime I store something or install something on that computer, when the computer restarted or after it shut down state, it will be gone like I’ve never exist on there after turn the computer on. Ugghh...

But, we (kind of) figured it out after several trial and error experiment we’ve been doing. We by mean my same friend that went nut doing my Sony Ericsson phone (I’m not mentioned his name ‘cause I’m not asking his permission to be featured in this story yet).

At home, I tried to make my computer looks like Windows Vista ‘cause it has gorgeous looking than my solid crap Windows XP that didn’t do nothing. I started to install Rocketdock, Windows Blind etc, it started very heavy and it barely I could use it anymore. Even to make PowerPoint, I need to go to safe mode where every

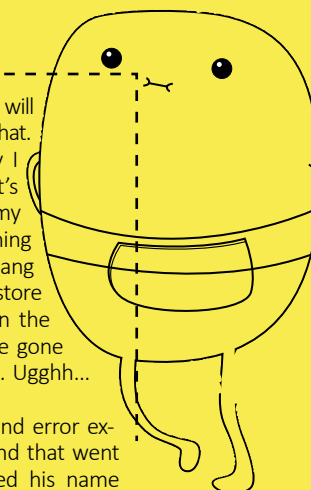

been bullied by my teacher because my mouse drawing is same as my friend, long story, I’ve been meltdown, no need to go in detail.

Time by time, I tried my best to improve my skill. I even don’t know where to start so I randomly try something I even didn’t know nothing about. But, (I didn’t know if this called hard work or something), as it evolved, people turn nice to me, and things started going well. I think I cannot fit the story here, so to be short, I loved design, I loved it. I got new laptop, same crap plus it’s heavy af, but at least it could handle the job.

Okay, now we’re back to the track on about my major. I make a lot of things, like magazine, pamphlet, logo, etc. Learning about typography and colour, layout and stuff. A lot of work, but I get the result.

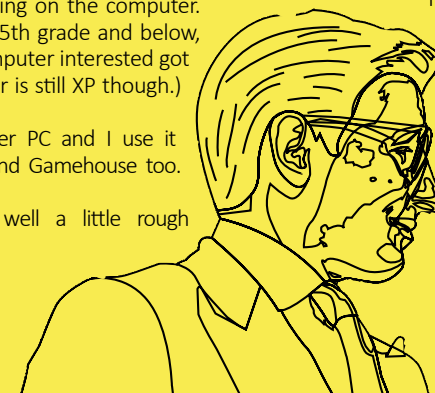

Because there’s a lot of stories in here I want to write, I think I’ll just skip it and write it on the new one later.

So, at the time of my graduation, I’ve been surprised that I’ve got an award from the best student in class, well, I’m on the third position but it’s okay. That is the best thing ever happened to me even though my math grade is, uhh, well, zero, but I’ve got about 25 on calculus tho. Apparently, my English, design and other subjects are the highest, above 90 to 100. I feel really grateful for this and confused at the same time. (*)
